Drill

Apply wood glue and insert it

Tap in the dowel

MILLER DOWEL answers perfectly to new design requirements and trends, whether for solid wood, plywood, or polished MDF furniture.

The connector provides the necessary support and can also be used as a styling element. These patented hardwood dowels ensure a precise fit in the hole, easily done with the original 'Tru-Fit' drill. Either matching or contrasting with the wood type, four wood types - birch, oak, American walnut, and cherry - the dowels offer numerous applications and color combinations.

The Miller dowel allows for beautiful ecological furniture without glue. When is applied, the thin grooves ensure optimal glue distribution and prevent the glue from leaking onto the visible sides. The MILLER DOWEL is faster than usual techniques.

MILLER DOWEL is available in 3 sizes - mini-X L-42 mm, 1X L-70 mm and 2X L-89 mm - with the matching TruFit™ step drill bit.

Frame connections

For miter joints and any cut. Together with mortise and tenon joint, very strong sealed joints are possible. Or frame connections are made using only the MILLER® DOWELS.

Case goods

The clamping points allow an optimal finishing even on large surfaces. MILLER® DOWEL is faster compared to conventional techniques.

Strong joints

The MILLER® DOWEL is a very secure joining solution for solid wood parts thanks to its gluing grooves and slight swelling.

MILLER® DOWEL

Wooden nails for natural wood furniture

Art.-No.	Unit	Description	
Z3003 K	100 Pc.	Mini-X Miller Dowel Birch	Length 42 mm / steps 2,6 - 4,8 - 6,5
