Plug-in connector FIYU®

Plug in connection on tongue and groove basis for furniture and fittings

FIYU® FAST

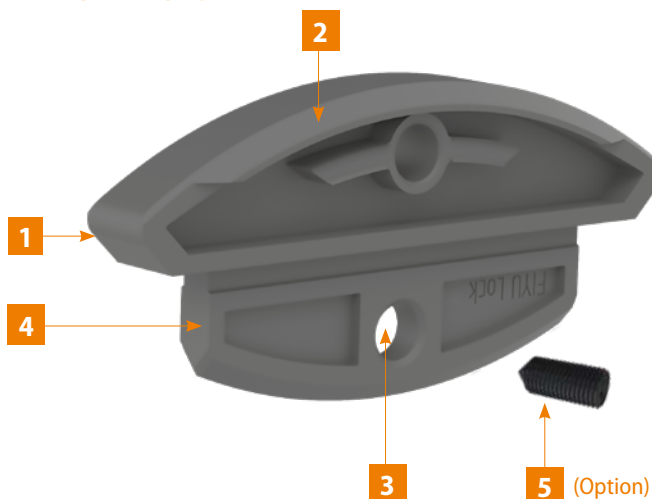

System advantages

- Plug-in connection on tongue and groove basis for immediate stability
- Tight and precise guidance
- Manual and industrial processing
- Stackable
- High clamping force and 100% perfect fit
- Safety due to high load capacity
- Loadable in two directions

- | | |
|----|-----------------------------------|
| 1 | FIYU® FAST – Spreading lamella |
| 2 | Fixing edge |
| 3 | Cutting edges |
| 4 | Guide pin |
| 5 | Spring hook |
| 6 | FIYU® FAST – Clamping lamella |
| 7 | Cutting edges |
| 8 | Spring hook receiver |
| 9 | Slots for guide pins |
| 10 | With grub screw 6x12 mm on option |

FIYU® LOCK

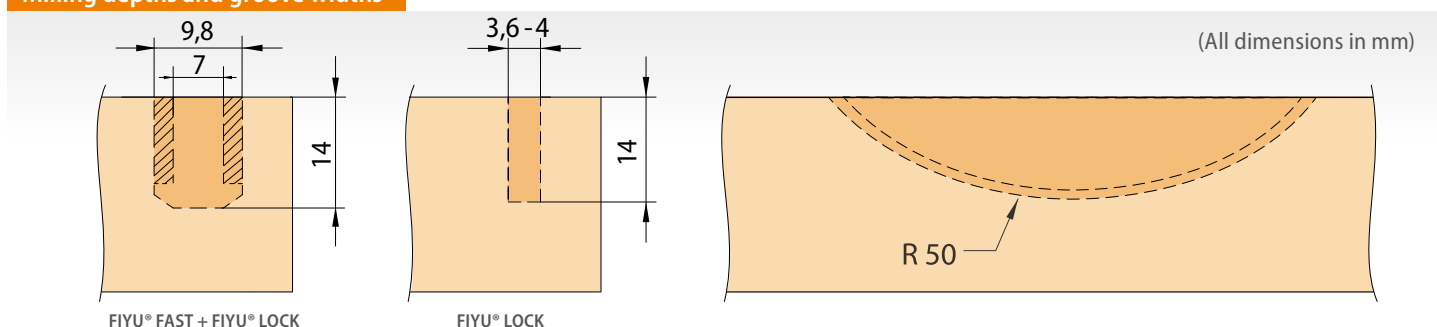

System advantages

- For material thicknesses from 16 mm with the one plug-in part
- Retrofitting installation of shelves as shelf supports
- Flexible assembly sequence
- Fast and easy disassembly

- | | |
|---|--|
| 1 | FIYU® LOCK – half-moon shaped plug-in part |
| 2 | Cutting edges |
| 3 | Hole for optional fixation |
| 4 | Spring lamella (4mm) |
| 5 | Optional grub screw 6x12 mm |

Milling depths and groove widths

Plug-in connector FIYU®

Tongue and groove connectors for furniture and fittings

FIYU® – easy to connect, safe, fast and reversible

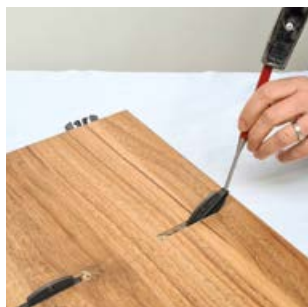

FIYU® - the connectors with the cutting edges have clever details:

Thanks to well thought-out details, it not only connects securely and exceptionally quickly, it is also ideal for countless areas of application. It connects cabinet parts from an angle of 0 to 135°. The FIYU® LOCK is a particularly suitable solution

for retrofitting shelves. It even holds all by itself - saving time and money. Optionally, the one-piece connector can fix the components with a clamping screw.

FIYU® FAST is a self-tensioning cabinet connector that can connect miter joints and 90° joints firmly and detachably. It can also be used as a gluing aid.

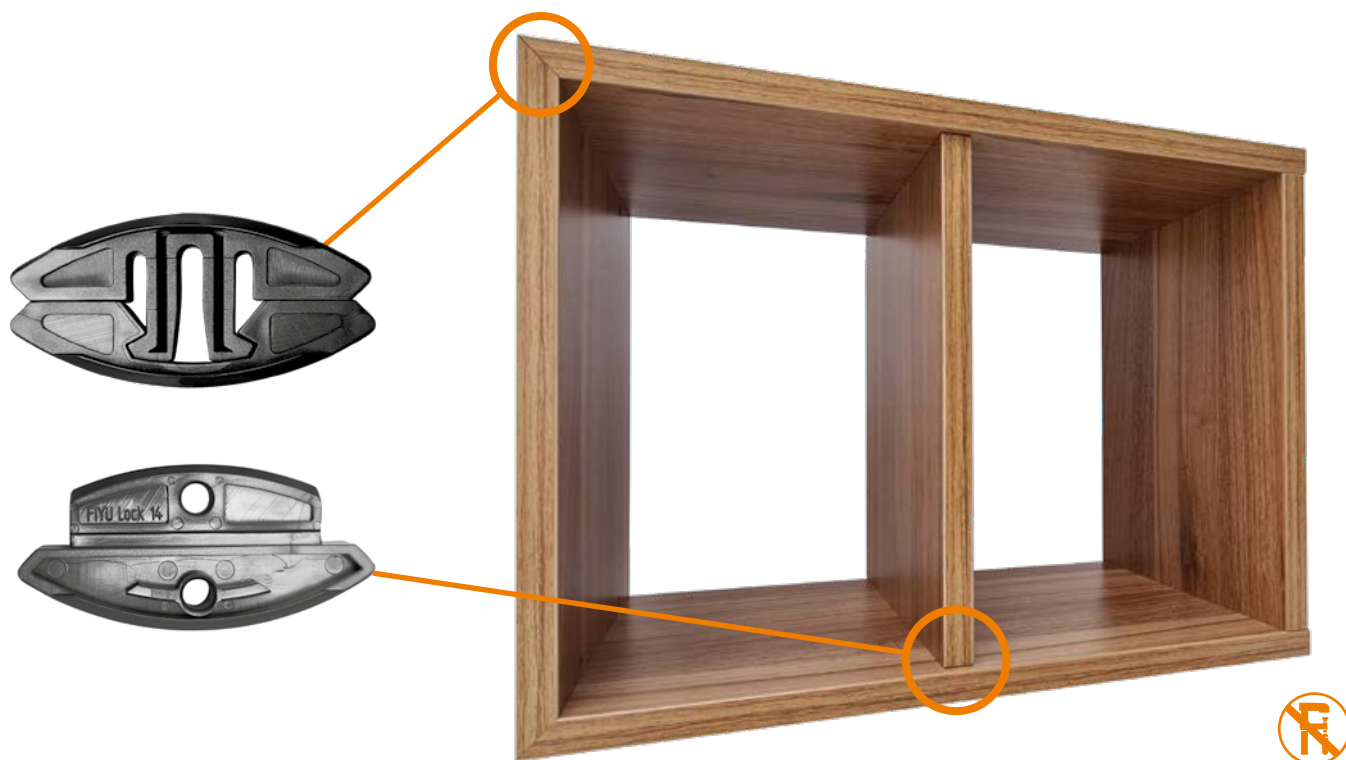

Installation

Drive in the connector, flush with the board using the insert tool.

Use a rubber hammer to release the self-tightening mechanism.

Usage:	For cabinets, intermediate shelves, 45 ° miter joints, partition walls, the installation of shelves as well as retrofitting shelves, frames, covers and profile strips.
Advantages:	Concealed, self-tightening, re-assemblable tongue and groove connector, immediately ready for use.
Choice of material:	All woods, synthetic materials (FIYU® LOCK), from a panel thickness of 16 mm; All softwood and uncoated plastic materials (FIYU® FAST)
Processing:	With CNC, flat dowel machine, adjust depth setting accurately, insert plug-in part and holding part into milled groove.
Attachment:	Insert the connector flush with the edges and push the components into place.

Concealed | Self-tightening | Demountable

FIYU® connector versions

FIYU® LOCK

Art.-No. K856/S Half-moon shaped plug-in part

ACCESSORY

100 FIYU® LOCK plug-in parts
100 FIYU® FAST connectors
100 grub screw 6x12 mm

Further Knapp connector recommendations for furniture are available at www.knapp-connectors.com:

Plug-in connector made of plastic

Art.-No. K058

FAST

- Concealed, self-tightening, dismantlable connector, immediately ready for use.
- To plug-in trims, face frames, furniture and mouldings.
- Fastening by tapping along the radius of the cutting edges on both sides, and optional gluing.

Slide-and-screw in biscuit connector, die cast zinc

Art.-No. K026

METAL

- Concealed, self-tightening, dismantlable connector with integrated locking stop.
- For cabinet and frame furniture, door frames to be plugged-in without clamps, for miter joints.
- Fastening with PH screws.

Slide-and-knock in biscuit connector, die cast zinc

Art.-No. K049

SILVER

- Concealed, self-tightening, dismantlable with integrated locking stop, immediately resistant to loads.
- For cabinet furniture, gluing aid for miter joints and corners without clamps.
- Fastening by tapping along the radius of the cutting edges on both sides.

Slide-in biscuit connector, glass fiber reinforced plastic

Art.-No. K023

CHAMP

- Concealed, self-tightening, dismantlable connector.
- For cabinet furniture, gluing aid for miter joints and corners without clamps.
- Fastening using the KNAPP® Adhesive PU+

Slide-in biscuit connector made of plastic

Art.-No. K053

SUNNY

- Concealed, self-tightening, dismantlable connector with integrated locking tabs.
- For cabinet furniture, gluing aid of miter joints and corners without clamps.
- Fastening by tapping along the radius of the cutting edges on both sides.

FIYU® has a patent pending.
