

DUO 35

Load values F_1

Material thickness d	Wood panel type	Admissible load F	
20 mm	Coated particleboard + Euro screw 6.3x10	130 N	~ 13 kg
20 mm	Coated particleboard + Spax screw 5x20	280 N	~ 28 kg
10 mm	Kronoswiss MDF board + Euro screw 6.3x8	195 N	~ 19 kg

The admissible load values F in the insertion direction were determined through internal tests!

DUO 35 was installed with 2 specified wood screws.

DUO 35 was tested on particleboard with a minimum density of 650 kg/m³ and on MDF board with a minimum density of 820 kg/m³.

The permissible values indicated have triple safety compared to the average breaking strength!

Knapp GmbH assumes no liability for the admissible load values indicated.
