Drilling

Apply wood glue
and positioning

Hitting

Whether solid wood furniture, plywood or high-gloss MDF, the MILLER DOWEL answers perfectly new design demands and trends. The connector provides the required support and can also be used as a style element. Patented, these hardwood nails guarantee a perfect positioning in the drill hole, which can be easily made with the original "Tru-Fit" drill. The various wood species available, Birch, Oak, American walnut and Cherry, allow for discreet or contrasting applications with attractive color combinations.

MILLER DOWEL can be used without glue and is therefore a solution for ecologically valuable realizations. When glued though, the small grooves along the nails allow an optimal distribution and prevent the glue from sticking out on the visible sides.

MILLER DOWEL is available in 3 sizes - mini-X L-42 mm, 1X L-70 mm and 2X L-89 mm, they are available in our starter boxes along with the matching TruFit™ step drill bit.

Frame connections

For miter joints and any cut. Together with mortise and tenon joint, very strong sealed joints are possible. Or frame connections are made using only the MILLER® DOWELS.

Case goods

The clamping points allow an optimal finishing even on large surfaces. MILLER® DOWEL is faster compared to conventional techniques.

Strong joints

The MILLER® DOWEL is a very secure joining solution for solid wood parts thanks to its gluing grooves and slight swelling.

MILLER® DOWEL

Wooden nails for natural wood furniture

Art.-No.	Unit	Description	List Price
Z3003 K	100 Pc.	Mini-X Miller Dowel Birch	Length 42 mm / steps 2,6 - 4,8 - 6,5 20,00 €
